

Designed for use subsea, and remote operated through ROV.

Description:

Transfer the energy from a standard Class 4 Torque Tool with 2700 Nm torque through gear system which gives up to 4000 Nm torque onto the stem.

Drive unit:
Torque Tool Class 4
2700 Nm (DEP-DS-416)

Specification:

Standards: ISO 13628-8, API 17D□
Torque max: 40 kNm.
Ratio: 1:16
Weight in air / water: 55/45Kg.
Max water dept: 3000 m
Dimensions LxHxW: 479x344x280 mm.
Nose Ø240 mm x 292 mm.
Depro Drawing: DEP-GA-0398

Tools designed for submersion over long periods on request.
Tool adapters, verification units, control systems etc. see specific datasheets.
