

Protect connection points for debris and marine growth

Description:

These products protect important interfaces during storage, transport, installation and operation. All interfaces and material can be influenced by storage conditions, and to avoid damage, marine growth and erosion, a protection cap can be a valuable investment. This device secures good access and connection to valves and connections points during operation and the equipment lifetime. Selective use of materials (included anode materials) protect and avoid marine growth and erosion. Depro have a wide range of this kind of equipment, here is some example.

Torque Tool Buckets

Linear Actuator

Valve Bucket

Specification:

Description	Depro Drawing	Dimension (HxØ)	Bucket size	Weight
Torque Tool Bucket Class 4	DEP-GA-0526	196x200mm	Ø155mm	3,6kg
Torque Tool Bucket Class 5	DEP-GA-0476	190x230mm	Ø192mm	5,0kg
Torque Tool Bucket Class 6&7	DEP-GA-0492	250x283mm	Ø245mm	7,9kg
Torque Tool Bucket 94A - 720	DEP-GA-0493	250x283mm	Ø245mm	7,9kg
Torque Tool Bucket 94A - 940	DEP-GA-0494	259,5x340mm	Ø302mm	12kg
Valve Bucket (Ø ID 79mm)	DEP-GA-0506	160x90mm	Ø79mm	0,6kg
Linear Actuator Bucket TypeA	DEP-GA-0562	190x185mm	Ø175mm	2,9kg
