

Referenced standards: API 17H, ISO 13628-8

Description:

The Verification Unit for Torque Tool is designed to verify correct torque before performing subsea operations.

Specification:

Standard torque range

Accuracy

Class 4 interface

Weight

Dimensions H x Ø

Handheld display

67 - 2711 Nm,

+/- 5% of readout value

API 17H / ISO 13628-8

38 kg

380x400 mm

Included

Base Units:

- Verification Unit CL4

DEP-GA-0150

Available tools and addons:

- Torque Tool CL 1-2

- Torque Tool CL 2-4

DEP-GA-0769 / DEP-GA-0770

DEP-GA-0771 / DEP-GA-0772

Customized torque range on request.
Tool adapters etc. see specific datasheets.
