

Referenced standards: API 17H, ISO 13628-8

Description:

The Verification Unit for Torque Tool is designed to verify correct torque before performing subsea operations.

Specification:

Standard torque range	1356 Nm - 6779 Nm
Accuracy standard torque range	+/- 3,5% of readout value
Supplementary torque range	0 - 1356 Nm
Accuracy supplementary torque range	See supplementary torque measurements for individual accuracy.
Class 5 interface	API 17H / ISO 13628-8
Weight	72 kg
Dimensions H x Ø:	380x400 mm
Handheld display	Included

Base Units:

- Verification Unit CL5	DEP-GA-0104-A
-------------------------	---------------

Available tools and addons:

- Torque Tool CL 5, Receptacle version,	DEP-GA-0433
- Torque Tool CL 5, Direct powered version,	DEP-GA-0544

Customized torque range on request.
Tool adapters etc. see specific datasheets.
